The checklist on the back page of this brochure will take the guesswork out of the ordering process! Or just contact your Focus Foodservice Representative. Let us help you configure the right system and provide you with the proper build of materials for the job.

MAXIMIZE + MINIMIZE
YOUR STORAGE CAPACITY THE SPACE NEEDED TO DO IT!

EZ-WALL™ STORAGE SYSTEM

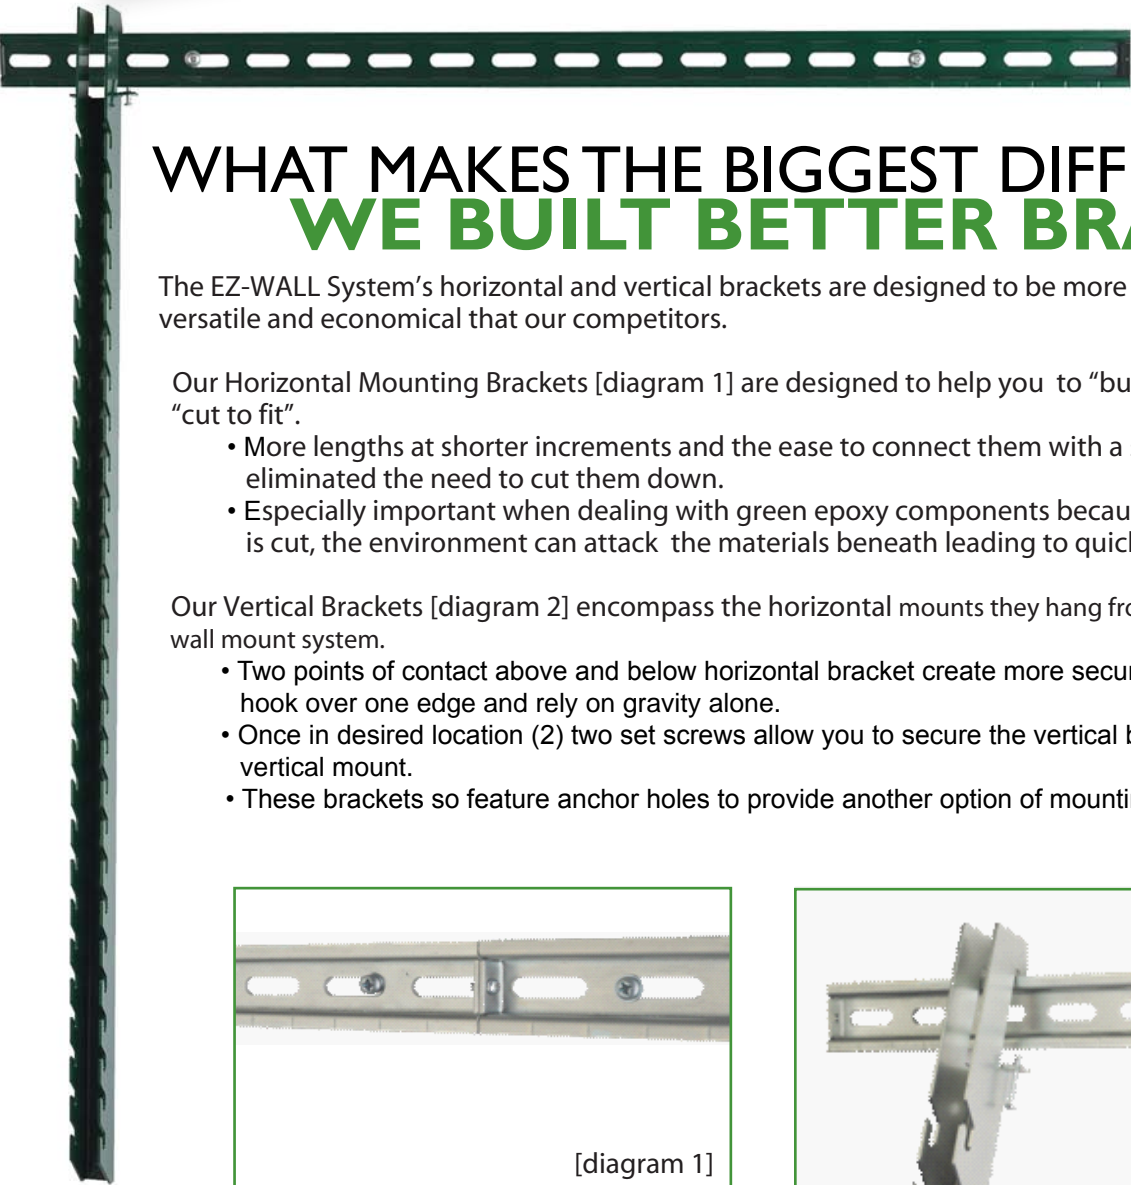

CUSTOMIZE TO MAXIMIZE

Every storage situation maybe different, but there is usually one thing that every foodservice facility has in common... **the lack of space!**

Whether your need is for a dry, wet or cold application, an EZ-Wall System can be help you capture more storage opportunities by utilizing the walls throughout your workplace.

Even better, our EZ-Wall System is so versatile that it can be modified to accommodate your needs. It can even be added to an existing system.

WHAT MAKES THE BIGGEST DIFFERENCE

WE BUILT BETTER BRACKETS

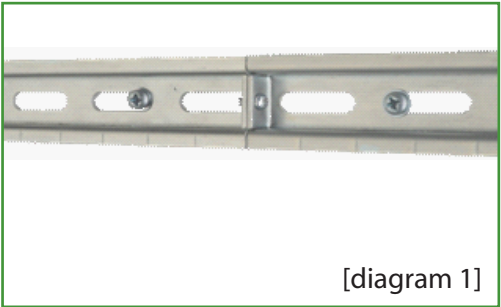

The EZ-WALL System’s horizontal and vertical brackets are designed to be more modular, versatile and economical that our competitors.

Our Horizontal Mounting Brackets [diagram 1] are designed to help you to “build-into” the space not “cut to fit”.

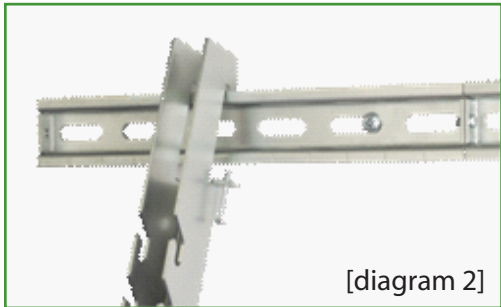

- More lengths at shorter increments and the ease to connect them with a small set screw, eliminated the need to cut them down.
- Especially important when dealing with green epoxy components because once the epoxy coating is cut, the environment can attack the materials beneath leading to quicker rust and corrosion.

Our Vertical Brackets [diagram 2] encompass the horizontal mounts they hang from making it the most secure wall mount system.

- Two points of contact above and below horizontal bracket create more secure mount than others that hook over one edge and rely on gravity alone.
- Once in desired location (2) two set screws allow you to secure the vertical brackets to the vertical mount.
- These brackets so feature anchor holes to provide another option of mounting to the wall for stability.

[diagram 2]

WE’RE MAKING IT EASIER TO CASH AND CARRY

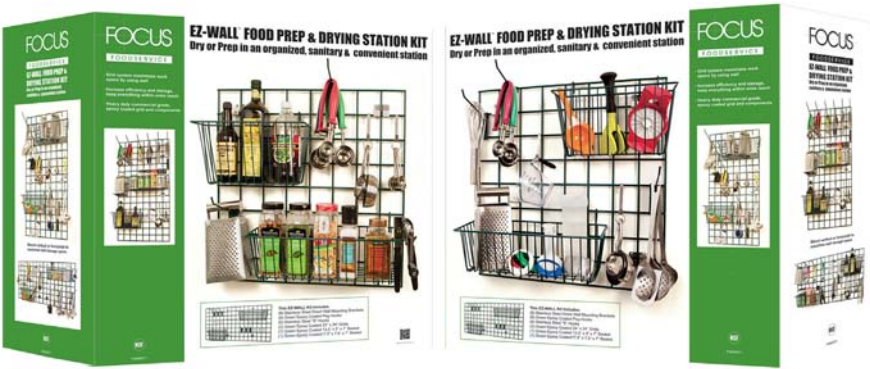

THE EZ-WALL™ PREP & DRYING KIT

Here’s a great way to introduce your customers how simple and versatile a wall storage system can be. We have developed a basic kit that will help increase storage and workflow efficiencies in either a prep or wash station application...or both. Our grids can be used independently of the horizontal and vertical brackets by using our direct wall hooks.

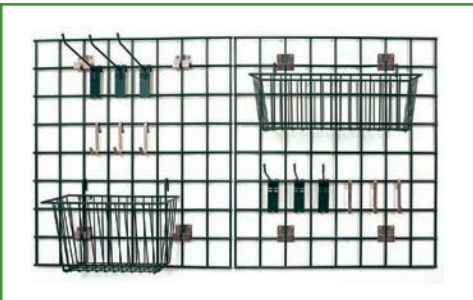

Full color packaging illustrates how this unit can be used for prep or as part of a wash station. Detailed images demonstrate the components being used in various configurations.

This EZ-WALL™ Kit Includes:

- (8) Stainless Steel Direct Wall Mounting Brackets
- (6) Green Epoxy Coated Peg Hooks
- (6) Stainless Steel “S.” Hooks
- (2) Green Epoxy Coated 24” x 24” Grids
- (1) Green Epoxy Coated 13.5” x 5” x 7” Basket
- (1) Green Epoxy Coated 17.5” x 7.5” x 7” Basket

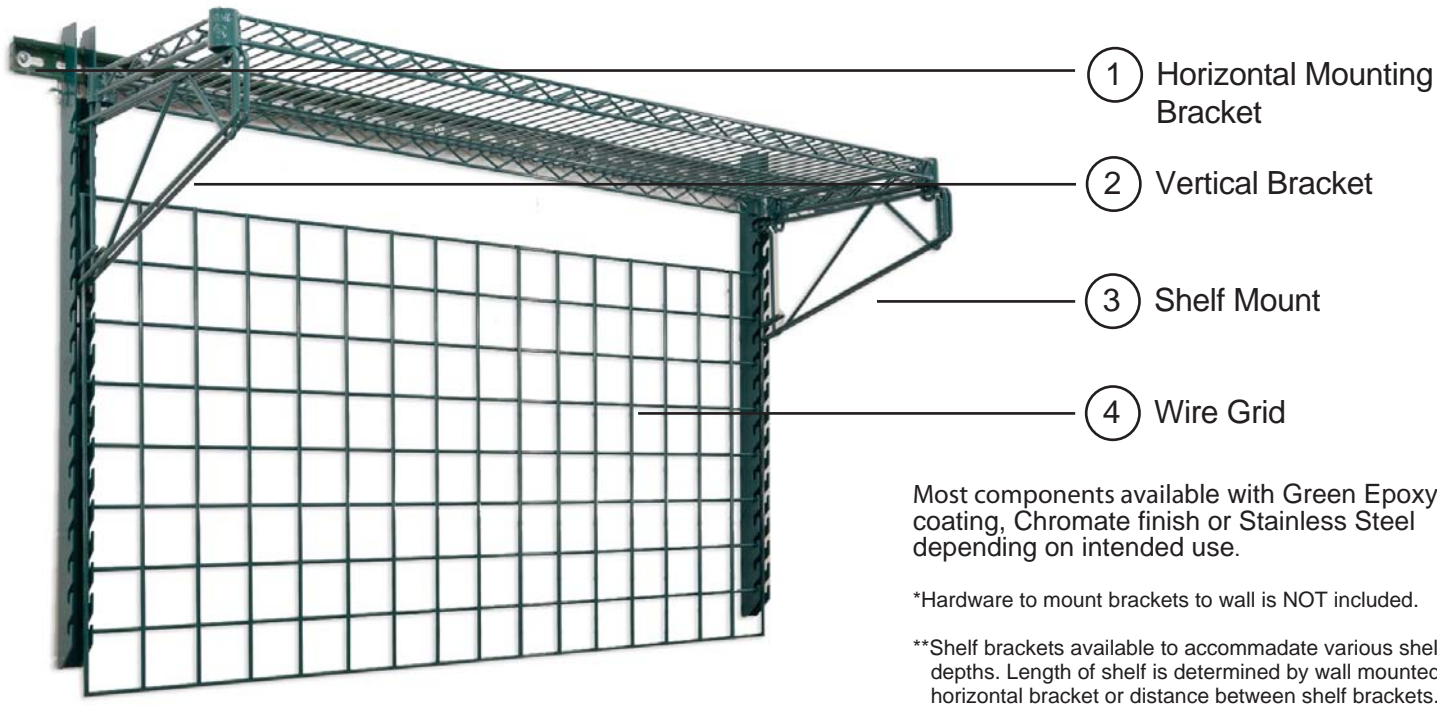

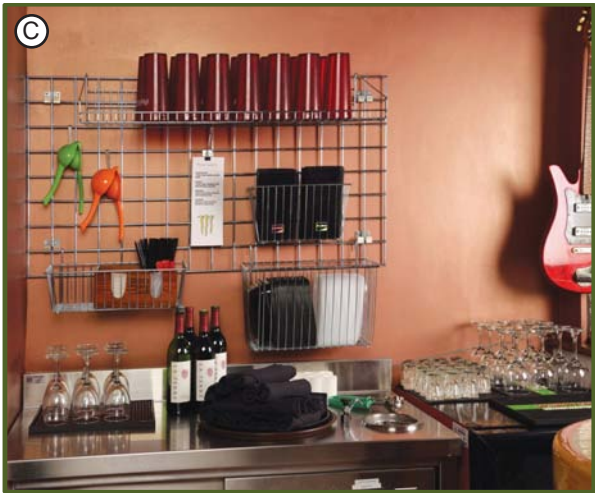

Our green epoxy wire grid along with green epoxy and stainless steel accessories help organize your work spaces as well as promote cleaner storage for both a prep and wash stations in versatile and modular ways.

Versatile and Module. Components can all fit on one grid or will fill two.

THERE ARE STORAGE OPPORTUNITIES EVERYWHERE
EZ-WALL™ GOES ABOVE AND BEYOND!

Ⓐ Adding a wire grid behind a large table stand mixer increases efficiency and organization by keep tools within arms reach. Ⓑ Combine a Focus pot rack/shelf, EZ-Wall wall mounted grid and shelving unit above a small sink to provide multiple storage / drying opportunities. Ⓒ An EZ-Wall with cantilevered shelf, hooksand baskets removes clutter from a small countertop. Ⓓ Using a chromate finish horizontal mount withsmall wire grid brackets and accessories creates a well-organized and industrial feel, plus the stainless steel under counter utility cart increases the functionality to this waiters’ station.

HERE’S THE BASICS ON
ORDERING YOUR EZ-WALL™ SYSTEM:

Choose Green Epoxy coated or Chromate finish components [depending on your intended use]. Green Epoxy components can be used in any type of application; dry, wet or cooler. Chromate components are recommended for dry applications only.

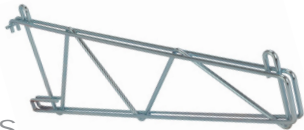

- ⓫ Horizontal Mounting Bracket
Horizontal bracket that mounts to wall. Create a workspace from 12” to 60”. Each bracket includes one connecting screw for use with multiple horizontal modules to fit your environment. ***Hardware to mount brackets to wall is NOT included.**

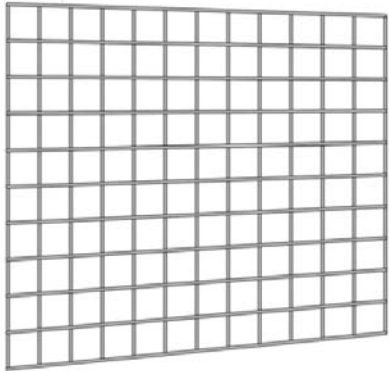

- ⓫ Vertical Brackets
These vertical brackets that attach to the horizontal mounting bracket and include two set screws to secure them to the horizontal mounting brackets to reduce side-to-side “swing”. Holes in brackets allow for additional screws to be used for greater safety and security. Brackets are available in 3 lengths and 2 finishes. ***Hardware to mount brackets to wall is NOT included.**

- ⓫ Shelf Mounts
Mount into the slots in the vertical supports. Use single mounts with single shelf configurations or double shelf mounts for side-by-side multiple shelf units.

- ⓫ Wire Grids
Can easily be attached to vertical brackets without hardware. **** Additional components to mount grid to horizontal bracket or directly to wall are available. *Hardware to mount to wall is NOT included. See back page of document.**

- ⓫ Accessories
Now your are ready to pick out your accessory components. We offer over 30 component to customize your unit. From hooks to baskets, to cantelievere shelves and specilized items such as a 48” drying rack; our assortment is very comprehensive.

WHAT MAKES A EZ-WALL™ LIVE UP TO ITS NAME? IT'S ALL ABOUT THE COMPONENTS.

All EZ-Wall Components are easy to install and use. See list on the back page of this brochure or visit us online for the latest offering.

Horizontal and vertical brackets allow you to custom build the most modular and versatile wall storage system ever. They create the secure foundation to which all the other components can be attached and re-positioned as needed.

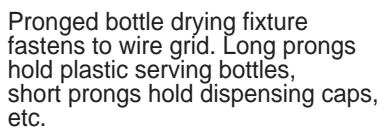

Stainless steel S hooks snap fit to grid.

Wire baskets are available in 2 finishes and 3 sizes to help organize almost anything.

A 48" green epoxy drying rack offers a to safely dry and store a variety of bakware, covers, etc.

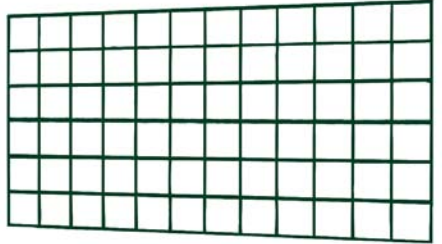

Peg hooks are designed to wrap around grid wires to provide a more stable fixture for items to hang from.

Bin holders also available (not shown in use)

Utility holder hook [left] fastens to wire grid to hold plastic utility basket [right]. Utility basket sold separately.

Wire grids can be hung from vertical brackets (above), hung by smaller brackets (shown on page to right) or mounted directly to wall with 4 to 6 hooks (inset right).

BEFORE:
Limited shelf storage space could not hold enough of the essential spices or ingredients use everyday. The fabricated wood shelves were a health code risk and not easy to clean or care for. Ingredients were close, but still hard to access. No space for prep tools and materials needed to keep the kitchen running smoothly.

AFTER:
Chromate EZ-Wall Unit replaces shelving with easier accessibility and visibility. Modular storage and grid mounted wire baskets (second row of shelves) bring ingredients closer to prep faster and more efficiently. Now, there is more room for additional back stock. Grids allow for all utensils and gadgets to be within reach at all times. Grid mounted wire baskets (to right) become instant storage for disposal gloves, small boxed goods, etc.

WHAT'S BETTER THAN BEFORE?

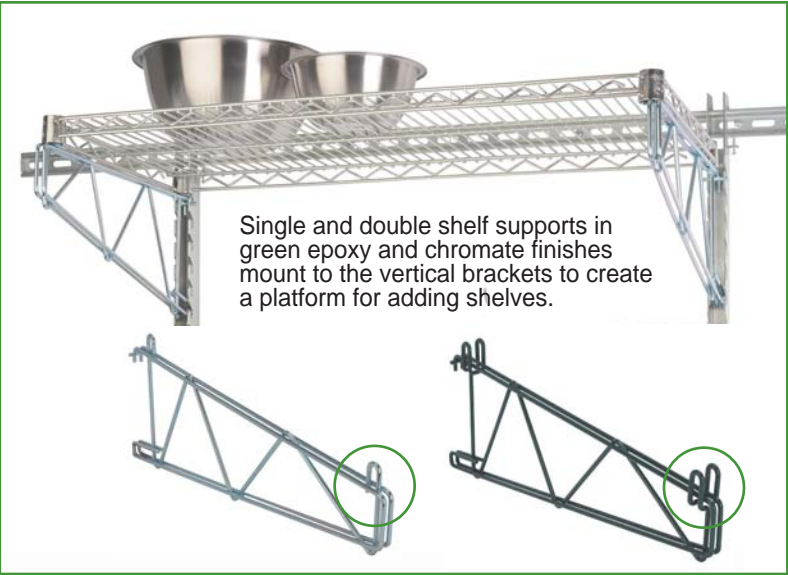

AFTER WITH EZ-WALL™

Amazing transformations from underutilized workspaces to a highly organized and efficient workstations.

BEFORE:
50 square feet of under utilized wall space.
Limited storage directly above the sink, was being used for cleaning chemicals, leaving the rest of the wall area empty - without purpose.
No where to hang pots or pans, utensils, etc. to dry properly.

AFTER:
Maximized use of existing wall space.
Cleaning solutions stored at the end of the unit.
Green epoxy wire shelves, drying rack and grids with hooks and baskets allow everything from pots and pans to small tools and gadgets to completely dry before storing. Creating a safe and sanitary environment. Plus additional storage space is created for frequently used items, keeping everything within arms reach.

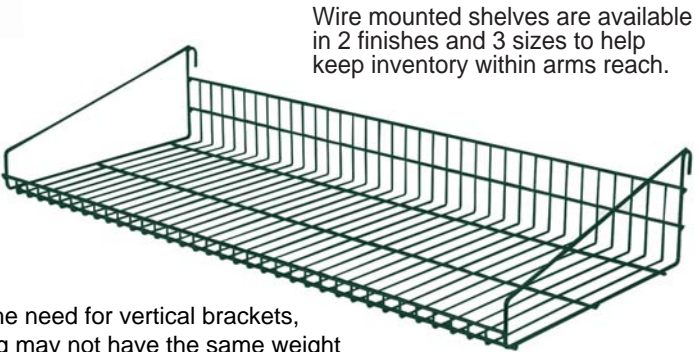

Single and double shelf supports in green epoxy and chromate finishes mount to the vertical brackets to create a platform for adding shelves.

[fig. 1]

Our #10 Can Holder has been designed to mount on to the wire grid.

Wire mounted shelves are available in 2 finishes and 3 sizes to help keep inventory within arms reach.

Wire mounted shelves mount directly to the grids. This eliminates the need for vertical brackets, shelf supports and additional shelves. However this style of shelving may not have the same weight capacity as those installed with the components listed above.

Various specialized brackets [fig. 2-4, below] are available to retro-fit some of our most popular items to the horizontal mounts that the standard vertical brackets cannot. For example, the bracket [shown in fig.1 and fig. 4] has been designed to hang a wire grid or our utensil rack directly from the horizontal bracket.

Additional retro-fit brackets [shown below] can accommodate other existing items currently in our assortment. The advantage to using these brackets with your EZ-Wall systems is that you are no longer mounted shelving directly to the wall, so you can move or adjust the position of your shelving depending on your needs.

FWMAFWSAL1224CH used with our aluminum and stainless steel K/D shelf kits.

[fig. 2]

FWMAFWPS13CH used with post mount shelving.

[fig. 3]

FWMAFUR1824CHSS used with wire grids or existing utensil rack.

[fig. 4]

WHAT TO KNOW BEFORE YOU INSTALL

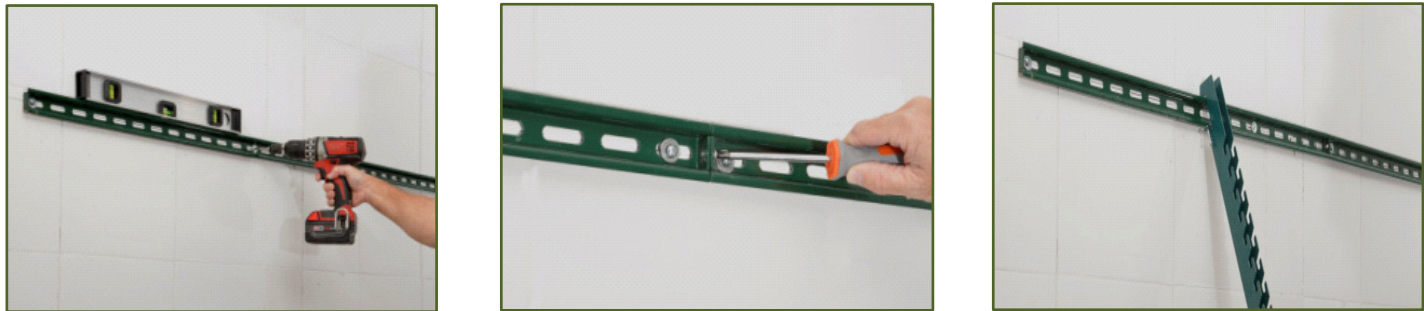

IT'S TIME TO WEIGH IN

Weight capacity your EZ-Wall unit can hold will be determined by how it is anchored to the wall. Focus is not responsible for product failure due to incorrect installation. With the exception of our direct wall mount hooks [FWMB6SS] used to install our wire grids as a stand alone, we do not furnish any type of wall mounting hardware. Below is a general guide of the estimated weight capacities that a properly mounted horizontal bracket can withstand when mounted to these types of structural foundations.

- Wood Studs - 400 lb. (180kg)
- Woods Studs with cross-stud reinforcement - 400 lb. (180kg)
- Concrete - 200 lb. (90kg)
- Plywood (1/2") - 400 lb. (180kg)
- Metal Studs - 100 lb. (45kg)
- Environmental room and walk-in cooler walls [appropriately reinforced] – Consult manufacturer

Install Horizontal Bracket(s) and Hang Vertical Brackets

Position Shelf Supports and Add Shelves

Mount Grid(s) and Accessories

HOW EZ CAN IT BE?

STEP-BY-STEP INSTRUCTIONS

- ① Install Horizontal Bracket(s) and Hang Vertical Brackets**
Start by installing the Horizontal Mounting Bracket(s). Use a level to position the bracket, then secure it to the wall. Repeat this step for any additional brackets you need.
Hint: If you are installing a system with more than one horizontal bracket, screw them together with the furnished set screw prior to mounting them to the wall. This will save you time in leveling the mount only once.
- ② Position Shelf Supports and Add Shelves**
Next, Hang the Vertical Brackets over the Horizontal mount. Determine the proper distance needed to hang any additional vertical brackets and repeat steps, accordingly. Tighten the set screws slightly to hold the vertical brackets in place. You'll finish tightening them once all components are in place. Position shelf supports where needed and add shelves. Continue this process until all shelves are installed.
Note: Remember, Single Shelf Supports are used for hanging single shelves and Double Shelf Supports are used to hang two shelves on one Vertical Bracket.
- ③ Mount Grid(s) and Accessories**
Mount Wire Grids to the Vertical Brackets below or behind the Shelf Supports. To position the grids behind the Shelf Supports, mount the grid first, then install the supports. After Your basic EZ-Wall storage unit is finished, choose from baskets, shelves hooks and drying to accessorize it.
